RIDER QUICKSTART GUIDE

HOW TO PLACE THE CPU

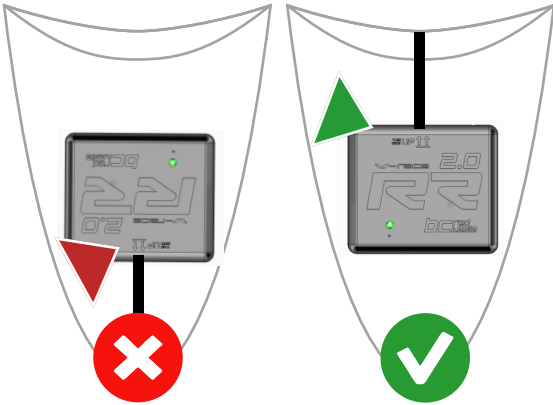

1  TURN ON THE CPU

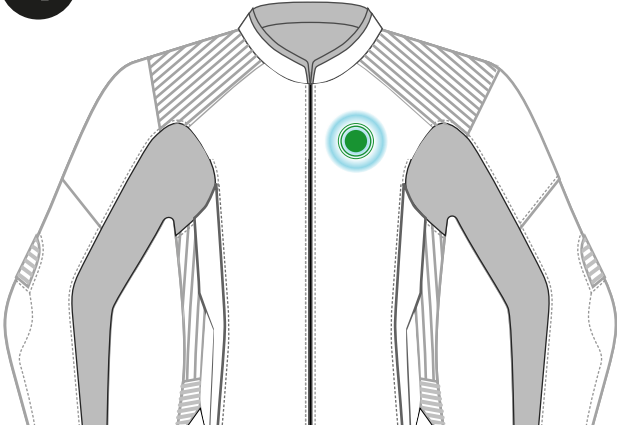

2  PLACE CPU INSIDE THE HUMP

3 CORRECT POSITION

4 CHECK THE LED COLOR ON THE FRONT

LED DIAGNOSTIC

After activating the CPU, you can check the proper functioning of the system via LED interface

LED COLOR	MEANING	ACTION (IF REQUESTED)
	Solid Red	Recharge required
	Flashing Yellow (3 flashes)	System ready GPS not connected
	Flashing Green (3 flashes)	System ready GPS connected
	Solid Purple	Pyrotechnic charge and cartridge replacement required. Then, confirm CPU RESET in the APP SETTINGS

1

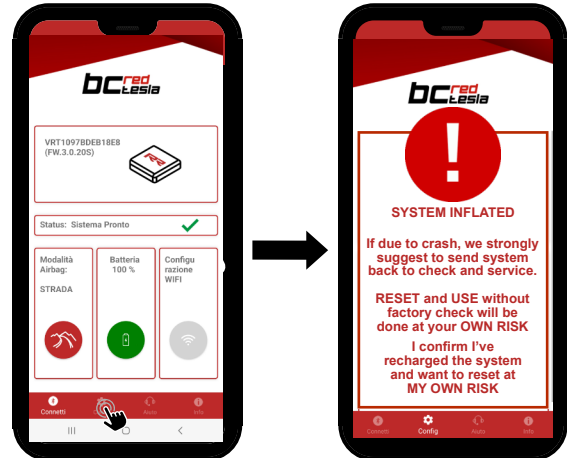

FOLLOW VIDEO GUIDE INSTRUCTION FOR RECHARGE

<https://www.youtube.com/watch?v=FKb3DhQVZQg&t=4s>

2

CLICK ON "SETTING", SELECT "RESET CPU" AND RESET THE CPU

In caso di caduta è suggerito l'invio in fabbrica del Sistema per i controlli di sicurezza. RICARICA e USO senza sudetti controlli sono a proprio RISCHIO e PERICOLO.

In case of crash, we strongly suggest to send system back to factory to check and service. RESET and USE without factory check will be done at your OWN RISK

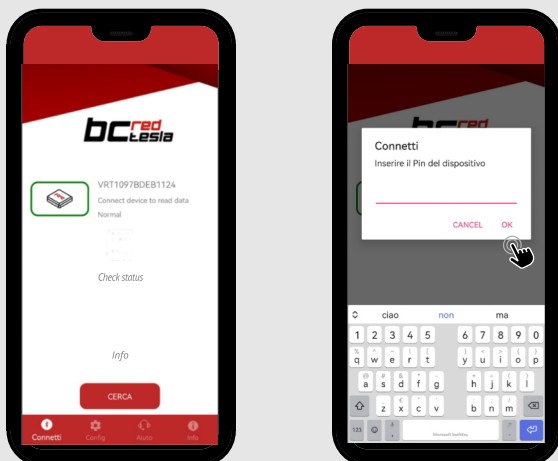

APP V-RACE RR 2.0
